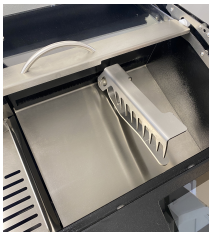
Overview

CSP (self service)

Equipment number: 12396628



Description

The mobile and compact CSP Self-Service can be flexibly placed on the selfservice bakery shelf. Your customers can slice their bread as desired by choosing from three preset slice thicknesses. Intuitive, guided operation via touch

screen for self-explanatory use.
Place the compact, space saving model CSP Self-Service exactly where you need it. The powerful, durable system delivers top results even for demanding products to be cut. The CSP for the self-service area is designed to save space. The floor model measures only 1 m in height and 80 cm in width. This device is optimally suitable for a wide variety of baked goods having a length of up to 38 cm - long or round bread, hard or soft texture, with or without nuts. The CSP circular blade slicer cuts precise and visually appealing slices. The self-explanatory, intuitive touch screen operation guides your customers through the slicing process. You may configure three slice thickness options for your customers to select from. The innovative SmarterSlicing functions allow an hygienic environment around the bread slicer at any time. An early warning system by means of indicators notifies you when the CSP is due for cleaning and when the blade requires sharpening or maintenance. Smart technology which ensures hygiene and availability of your machine. What's particularly convenient: Very smoothly running slicing process. Even at maximum performance, the planetary gear operates smoothly and is virtually maintenance-free. Convenient cleaning. Simply roll out the CSP to clean it all around.

Product information

Year of construction:	2025
Condition:	Refurbished acc. to Bizerba standard
Surface:	Anthrazit
Voltage variant:	240 V
Location:	Germany
Warranty:	6 month
Material number:	9090941 Bread Slicer
