

## Overview

# VSI F

# BIZERBA

Equipment number: 12421704

## Description

This Bizerba VSI T slicer is designed to stand up to the rigours of industrial production, offering an outstanding level of efficiency. It can introduce optimum slicing performance into your production line while keeping power consumption to a minimum thanks to its Emotion® technology. Target weight accuracy is assured thanks to an integrated tendency control to assist the operator; especially helpful when slicing products which are naturally grown. This means you can avoid the problem of overfilling, improve your efficiency, and ultimately have a positive effect on the bottom line.

## Product information

|                              |                                      |
|------------------------------|--------------------------------------|
| <b>Year of construction:</b> | 2025                                 |
| <b>Condition:</b>            | Refurbished acc. to Bizerba standard |
| <b>Surface:</b>              | Eloxal                               |
